utilities & engineering

## **Effective January 1, 2021**

Erosion Control, in collaboration with Building Services Inspectors, will begin verifying silt fences, gravel construction entrances, and other erosion control measures at the beginning of all new single family projects effective January 1, 2021.

Beginning January 1, 2021, the Permit Center will schedule the initial Erosion Control site inspections, along with the initial footing/foundation inspections, on new single family construction projects to ensure Erosion Control measures are in place at the onset of all new construction projects.

Further questions, please contact Erosion Control at (828) 465-8161.

**Thank you for preventing erosion in Catawba County.**
